

OSS 100

Product Sizing Capacity:
Width: 2-12 flaps”

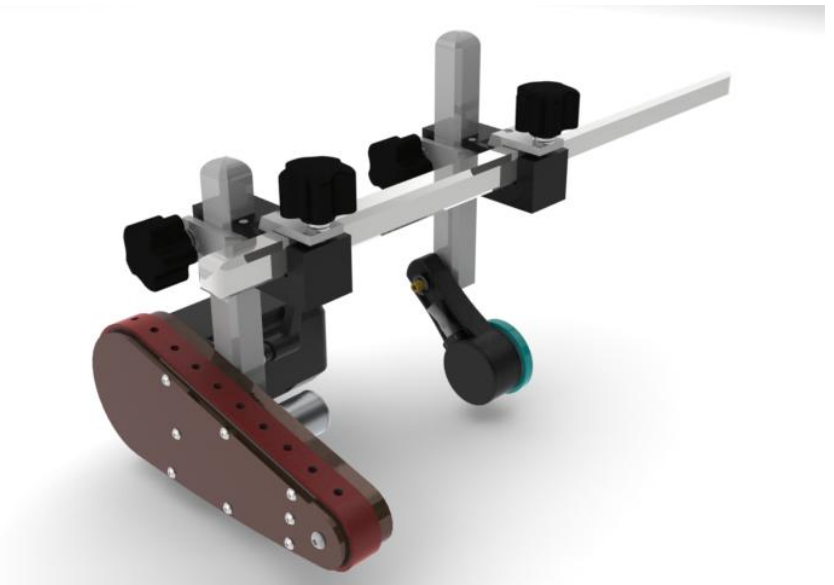

Opening Station (Stand-Alone) – Absolute position following controlled by onboard servo drive – has vacuum integration with vacuum modulation for maximum performance.

Gum rubber belts provide excellent traction for opening processes. Perfect for existing equipment attachment/retrofits – stall free design – the most powerful/effective vacuum system available today.

EASY Operation and Maintenance

This unit was engineered for simple trouble-free operation. – Turn it on and “go”.

- Servo drive
- Encoder mount
- +400’/Minute deck speeds
- Powder coated finish
- PID Vacuum control
- Easy to maintain
- Drive reversible
- Vacuum filter
- Solid lock-up System
- Storage cart

Options:

- Vacuum pump
- Custom pick wires/mounts
- Air assist kit

General Machine Specs:

Weight: 18 Lbs.

Power: 110V Single Phase (3 amp)

Air: NA
